HISTORY OF FOUR STAR

Established in Singapore, Four Star has more than 50 years of expertise in bedding and mattresses. We have been making ground-making innovations for our products and provided customers with better sleep since 1968.

Four Star is proud to be the first mattress company to introduce Anti-static and Pocketed Spring Mattresses in Singapore. The multiple international awards we received over the years are a testament to our innovative spirit and quality assurance.

Four Star is committed to providing comfort to everyone and this is evident in the partnership we have with the World Federation of Chiropractic (WFC). The WFC helps to develop effective products in the world for people with chiro pain problems and they have allowed us to gain valuable insights on back problems affecting sleep quality.

Four Star has become a trusted household brand that has continued to innovate and grow. We are constantly striving to provide technologically advanced mattresses that aim to improve sleep quality for many generations to come.

CHIRO+

CHIRO+ is the latest collection of the Chiro Series range that was initially launched in 2017, specially designed to provide orthopedic posture support which focuses on wellbeing, back care and support. With **Hexa-Coil Individual Pocketed Spring System** and **3E Natural Fibre**, CHIRO+ provides a stable construction, high durability and firmness of the mattress giving the optimal spinal support you need. **Dupont™ Sorona®**, is an eco-efficient performance fibre made from

plant-based ingredients, thus reducing any negative impact on the environment. The sustainable fabric is an eco-conscious product created without compromising performance, yet an innovation built with the 3E in mind - Environmental, Equity & Economy, reducing carbon footprints by 63%.

With its features like Organic Cotton certified by the **OEKO-TEX® Standard 100**, and Negative ion ticking to promote fatigue relief and more, you will be amazed how this series of mattresses can improve your immunity and sleep.

FEATURE

HEXA-COIL

- Staggered Inter-arranged Individual Pocketed Springs to provide a dense and body conforming support.
- Up to 30%* more spring compared to other pocketed spring mattress.

3E Natural Fibre

- Environmental, Equity & Economy.
- Eco-Friendly material that provides balanced tension and Chiropractic support.

Dupont™ Sorona®

- Eco-efficient performance fibre made from plant-based ingredients, reducing carbon footprints; Environmentally-Friendly (Traditional fibre is crude oil based).

Natural Latex

- Offers cushioning and enhanced support which allows a natural spine alignment while you sleep.
- Pin-holed structure provides ventilation and cooler sleep.

Memory foam

- Provides pressure relief while reducing motion transfer for minimal partner disturbance.

High-Density Foam Encasement

- Added strength and durability for the side support.

Organic Cotton Ticking

- Organically farmed cotton is grown without using fertilizers, pesticides, and other toxic chemicals.
- Environmental Sustainability.

Negative Ion ticking

- Helps to neutralize positively charged free radicals in body and provide health benefits such as fatigue relieving.
- Strengthening immunity improving sleep quality.
